- Duplicate the second cube in hole mode and size it to 35x50x0.5 mm, align it only in X axis. Make sure the 2 cubes in hole mode are in 3 mm height. Select the 3 objects and press group.

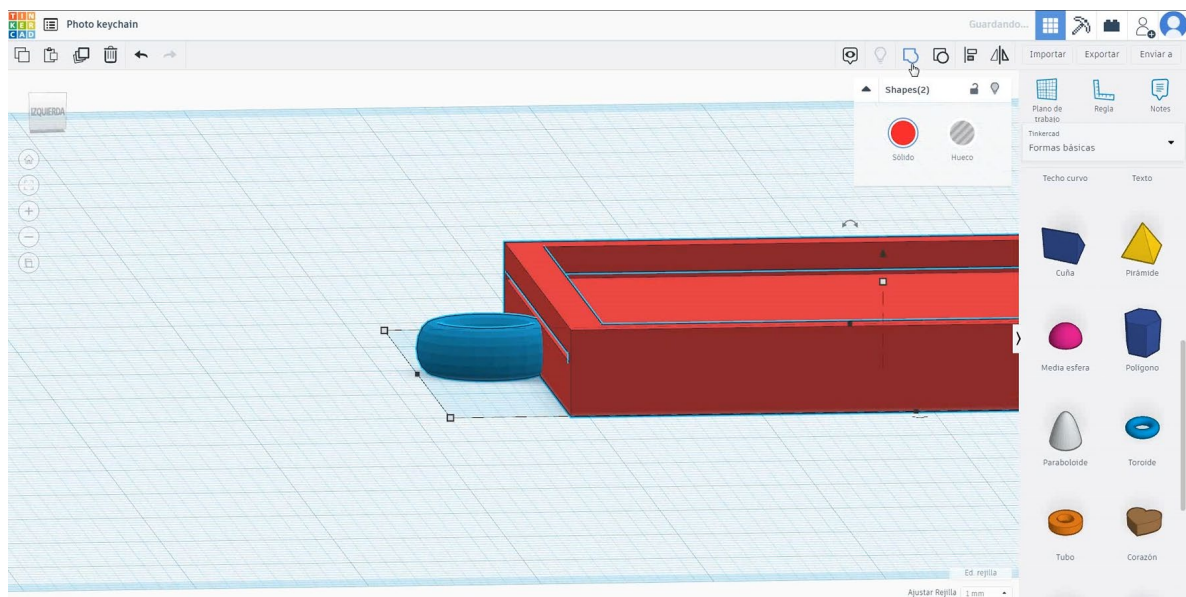

4. Choose the torus shape and size it to 8x8x3 mm and align it with the cube in X axis. Move it in Y axis to make sure both objects touch each other.

5. Select the torus and the cube and press group.

6. Now, the photo keychain is finished.
